

THE TIME IS NOW

**DO YOUR
PART**

**PRESERVE ANTIMICROBIALS
FOR TOMORROW**

Antimicrobial resistance (AMR) – which has been called the global health crisis of our time – is threatening to severely limit treatment options for humans and animals.

THE COLLEGE OF
VETERINARIANS
OF ONTARIO

THE TIME IS NOW

As a veterinarian, you can do the profession's part by using antimicrobials responsibly in your practice and educating your clients on antimicrobial resistance.

- Adopt an antimicrobial stewardship program (ASP) for your practice

- Weigh all treatment options

- Choose antimicrobials wisely and only as needed

- Think about the effect your decision might have on public health

- Educate clients on disease prevention

- Review current antimicrobial use guidelines

SPREAD THE WORD

Talk to your clients about the responsible use of antimicrobials.

Preventing AMR is everyone's responsibility.

For tools and resources you can use to help in the fight against AMR visit www.cvo.org/AMR
